

The Extreme EX-LW has been designed for use as a back-up antenna Applications such as Military HF Radio Manpacks, or anyone requiring an efficient lightweight portable antenna. The EX-LW has been constructed utilising a pliable wire-infused cord, know as "Flexiweave" which can easily be wound around the moulded winder-style antenna. This antenna is multi-band and covers between 3-30 MHz, which covers most frequency bands, however, no tuner is required. The EX-LW is not recommended for use as a base antenna, strictly a portable.

PACKAGE INCLUDES:

- 1 Winder moulded with balun (waterproof)
- 1 Load moulded (waterproof)
- 1 Stainless Steel Earth Stake
- 5m coaxial cable and connectors
- 10m Cord (2 x 5m lengths)
- 1 Earth Clip
- 1 Durable drawstring bag
